### Space Systems Academic Group (SSAG)

"... developing agile, innovative minds ..."

Our purpose is to prepare our students to lead in transformation and manage change in tomorrow's complex and technically challenging world. We fulfill that purpose by empowering student minds with advanced knowledge culled from cutting-edge, defense related research; by blending classroom experiences into a hands-on pedagogy that links theory and reality; and by teaching and inculcating creative, innovative thinking that prepares our students to continue to learn, grow, adapt and lead in future, unknown environments. Our graduates are more than just well educated engineers and scientists; they are innovative leaders of transformation and creative solvers of tomorrow's problems.
